Report of the Independent Accountant

To the Management of Internet Security Research Group ("Let's Encrypt")

Scope

We have examined the assertions by the management of Let's Encrypt and IdenTrust Services, LLC ("IdenTrust"), an independent subservice organization that provides Certification Authority ("CA") data center services to Let's Encrypt, that for its CA operations in the locations enumerated in the Attachment, for its CAs enumerated in the Attachment, Let's Encrypt and IdenTrust have:

- disclosed Let's Encrypt's business, key lifecycle management, certificate lifecycle management, and CA environmental control practices in the applicable versions of its ISRG Combined Certificate Policy and Certification Practice Statement ("CP/CPS"), as enumerated in the Attachment
- maintained effective controls to provide reasonable assurance that Let's Encrypt provides its services in accordance with its CP/CPS
- maintained effective controls to provide reasonable assurance that:
    - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
    - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
    - subscriber information is properly authenticated; and
    - subordinate CA certificate requests are accurate, authenticated and approved
- maintained effective controls to provide reasonable assurance that:
    - logical and physical access to CA systems and data is restricted to authorized individuals;
    - the continuity of key and certificate management operations is maintained; and
    - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

throughout the period of September 1, 2025 to August 31, 2026 based on the WebTrust Principles and Criteria for Certification Authorities, v2.2.2 for the relevant systems and processes used in the issuance of all certificates that assert policy object identifier 2.23.140.1.2.1.

Let's Encrypt does not archive its CA keys, escrow its CA keys, does not provide subscriber key generation services, subscriber key storage and recovery services, integrated circuit card lifecycle management services or certificate suspension services. Accordingly, our examination did not extend to controls that would address those criteria.

BDO USA refers to BDO USA, P.C., a Virginia professional corporation, also doing business in certain jurisdictions with an alternative identifying abbreviation, such as Corp. or P.S.C.

BDO USA, P.C. is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms.

BDO is the brand name for the BDO network and for each of the BDO Member Firms.

Let's Encrypt uses IdenTrust (subservice organization) to provide supplemental controls to the CA Environment to address criteria related to Asset Classification and Management, Physical and Environmental Security, Disaster Recovery, Backups, and Business Continuity Management, Monitoring and Compliance and Audit Logging for the Intermediate CAs enumerated in the Attachment. The controls designed by Let's Encrypt and operated by IdenTrust are necessary, in combination with controls at Let's Encrypt, for Let's Encrypt to achieve the applicable WebTrust Criteria as set out in Let's Encrypt's assertion.

Certification Authority's Responsibilities

Let's Encrypt's management is responsible for its assertion, including the fairness of its presentation, and the provision of its described services in accordance with the WebTrust Principles and Criteria for Certification Authorities, v2.2.2.

Subservice Organization's Responsibilities

IdenTrust has provided an accompanying assertion titled "IdenTrust Services, LLC Management's Assertion" (IdenTrust assertion) about the services provided to Let's Encrypt. IdenTrust Management is responsible for its assertion and providing services in accordance with the described practices of Let's Encrypt; and implementing, operating and documenting controls designed in accordance with Let's Encrypt's requirements, which enable Let's Encrypt to achieve the applicable WebTrust Criteria as set out in Let's Encrypt's assertion.

Independent Accountant's Responsibilities

Our responsibility is to express an opinion on management's assertion based on our examination. Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects. An examination involves performing procedures to obtain evidence about management's assertion. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material misstatement of management's assertion, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

The relative effectiveness and significance of specific controls at Let's Encrypt and their effect on assessments of control risk for subscribers and relying parties are dependent on their interaction with the controls and other factors present at individual subscriber and relying party locations. Our examination did not extend to controls at individual subscriber and relying party locations and we have not evaluated the effectiveness of such controls.

Inherent Limitations

There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. For example, because of their nature, controls may not prevent, or detect unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection to the future of any conclusions based on our findings is subject to the risk that controls may become ineffective.

Independent Accountant's Opinion

In our opinion, Let's Encrypt's and IdenTrust's management assertions, as referred to above, are fairly stated, in all material respects.

This report does not include any representation as to the quality of Let's Encrypt's or IdenTrust's services other than its CA operations in the locations enumerated in the Attachment, nor the suitability of any of Let's Encrypt's or IdenTrust's services for any customer's intended purpose.

Other Matter

Without modifying our opinion, we noted the following other matters during our procedures and have considered the nature of these matters in our risk assessment and in determining the nature, timing, and extent of our procedures. This included performing procedures to understand the root cause disclosed by the CA, and if facts and circumstances noted in our examination agreed with what has been disclosed. We have also considered the procedures the CA has designed and noted if implemented properly and operated effectively, the controls would address the root cause. We did not perform any procedures subsequent to this report as to the effectiveness of the controls implemented.

Matter Topic		Matter Description
1	Certificate Issuance	Let's Encrypt disclosed in Mozilla Bug #2038351 that three (3) cross-certified subordinate CA certificates generated in September 2025 were missing the serverAuth Extended Key Usage (EKU) extension required under CCADB policy.
2	Certificate Status Validation	Let's Encrypt disclosed in Mozilla Bug #2044788 that a database replication issue caused certificate-revocation entries to be temporarily omitted from published CRLs before the corresponding certificates expired.

While the Let's Encrypt assertion notes all issues disclosed on Bugzilla from September 1, 2025 through the date of this report, we have only noted those instances relevant to the CAs enumerated in the Attachment and applicable to the WebTrust Principles and Criteria for Certification Authorities, v2.2.2.

Use of the WebTrust Seal

Let's Encrypt's use of the WebTrust for Certification Authorities Seal constitutes a symbolic representation of the contents of this report and it is not intended, nor should it be construed, to update this report or provide any additional assurance.

BDO USA, P.C.

Internet Security Research Group Management's Assertion

Internet Security Research Group ("Let's Encrypt") operates the CA services for the root and subordinate CAs enumerated in the Attachment, and provides the following CA services:

- Subscriber registration
- Certificate renewal
- Certificate rekey
- Certificate issuance
- Certificate distribution
- Certificate revocation
- Certificate validation
- Subordinate CA certification and cross-certification

Let's Encrypt uses IdenTrust Services, LLC ("IdenTrust"), an independent subservice organization, to provide Certification Authority ("CA") data center services to Let's Encrypt.

The management of Let's Encrypt is responsible for establishing and maintaining controls over its CA operations, including its CA business practices disclosure on its repository, CA business practices management, CA environmental controls, CA key lifecycle management controls, subscriber key lifecycle management controls and certificate lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

Let's Encrypt uses IdenTrust (subservice organization) to provide supplemental controls to the CA Environment to address criteria related to Asset Classification and Management, Physical and Environmental Security, Disaster Recovery, Backups, and Business Continuity Management, Monitoring and Compliance and Audit Logging for the Intermediate CAs enumerated in the Attachment. The controls designed by Let's Encrypt and operated by IdenTrust are necessary, in combination with controls at Let's Encrypt, for Let's Encrypt to achieve the applicable WebTrust Criteria as set out in Let's Encrypt's assertion.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to Let's Encrypt's CA operations. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

Let's Encrypt's management has assessed its disclosures of its certificate practices and controls over its CA services. Based on that assessment, in Let's Encrypt's management's opinion, in providing its CA services in the locations enumerated in the Attachment, Let's Encrypt has:

- disclosed its business, key lifecycle management, certificate lifecycle management, and CA environment control practices in the applicable versions of its ISRG Combined Certificate Policy and Certification Practice Statement ("CP/CPS"), as enumerated in the Attachment

Docusign Envelope ID: EBC8A94F-2669-832A-80C3-FE9E0EEAFB52

- maintained effective controls to provide reasonable assurance that it provides its services in accordance with its CP/CPS
- maintained effective controls to provide reasonable assurance that:
    - the integrity of keys and certificates it manages is established and protected throughout their lifecycles;
    - the integrity of subscriber keys and certificates it manages is established and protected throughout their lifecycles;
    - subscriber information is properly authenticated; and
    - subordinate CA certificate requests are accurate, authenticated and approved
- maintained effective controls to provide reasonable assurance that:
    - logical and physical access to CA systems and data is restricted to authorized individuals;
    - the continuity of key and certificate management operations is maintained; and
    - CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity

throughout the period of September 1, 2025 to August 31, 2026 based on the WebTrust Principles and Criteria for Certification Authorities, v2.2.2, including the following:

- CA Business Practices Disclosure
    - Certification Practice Statement (CPS)
    - Certificate Policy (CP)
- CA Business Practices Management
    - CPS Management
    - CP Management
- CA Environmental Controls
    - Security Management
    - Asset Classification and Management
    - Personnel Security
    - Physical and Environmental Security
    - Operations Management
    - System Access Management
    - System Development, Maintenance, and Change Management
    - Disaster Recovery, Backups, and Business Continuity Management
    - Monitoring and Compliance
    - Audit Logging

Docusign Envelope ID: EBC8A94F-2669-832A-80C3-FE9E0EEAFB52

- CA Key Lifecycle Management Controls
  - CA Key Generation
  - CA Key Storage, Backup, and Recovery
  - CA Public Key Distribution
  - CA Key Usage
  - CA Key Destruction
  - CA Key Compromise
  - CA Cryptographic Hardware Lifecycle Management
  - CA Key Transportation
  - CA Key Migration
- Subscriber Key Lifecycle Management Controls
  - Requirements for Subscriber Key Management
- Certificate Lifecycle Management Controls
  - Subscriber Registration
  - Certificate Renewal
  - Certificate Rekey
  - Certificate Issuance
  - Certificate Distribution
  - Certificate Revocation
  - Certificate Validation
- Subordinate CA and Cross Certificate Lifecycle Management Controls
  - Subordinate CA Certificate and Cross Certificate Lifecycle Management Controls

Let's Encrypt does not archive its CA keys, escrow its CA keys, does not provide subscriber key generation services, subscriber key storage and recovery services, integrated circuit card lifecycle management services, or certificate suspension services. Accordingly, our assertion does not extend to controls that would address those criteria.

Let's Encrypt has disclosed the following matters publicly on Mozilla's Bugzilla platform. These matters were included below due to being open during the period September 1, 2025 through the date of this report.

Bug ID	Summary	Opened	Closed	Resolution

IdenTrust Services, LLC Management's Assertion

IdenTrust Services, LLC ("IdenTrust") provides Certification Authority ("CA") data center services to Internet Security Research Group ("Let's Encrypt"), who operates the CA services for the CAs enumerated in the Attachment.

The management of IdenTrust is responsible for establishing controls over its operations, to support Let's Encrypt's CA business practices disclosures on Let's Encrypt's repository, applicable CA environmental controls, and CA key lifecycle management controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

There are inherent limitations in any controls, including the possibility of human error, and the circumvention or overriding of controls. Accordingly, even effective controls can only provide reasonable assurance with respect to IdenTrust's services. Furthermore, because of changes in conditions, the effectiveness of controls may vary over time.

IdenTrust's management has assessed Let's Encrypt's disclosure of its certificate practices and IdenTrust's controls to provide its CA data center services to Let's Encrypt. Based on that assessment, in IdenTrust management's opinion, in providing its PKI services in the locations enumerated in the Attachment, IdenTrust has maintained effective controls to provide reasonable assurance that:

- physical access to CA systems and data is restricted to authorized individuals; and
- CA systems maintenance and operations are properly authorized and performed to maintain CA systems integrity

throughout the period September 1, 2025 to August 31, 2026 based on the WebTrust Principles and Criteria for Certification Authorities v2.2.2, including the following:

- CA Environmental Controls
    - Asset Classification and Management
    - Physical and Environmental Security
    - Disaster Recovery, Backups, and Business Continuity Management
    - Monitoring and Compliance
    - Audit Logging

Docusign Envelope ID: 9ADF1D1D-7F94-8FD9-83AF-E5A20B05295B

IdenTrust services include controls to support the physical and environmental security for CA operations systems. These controls include the relevant logging and monitoring controls related to physical and environmental controls provided by IdenTrust. The controls provided by IdenTrust support some elements of criteria include in the WebTrust Principles and Criteria for Certification Authorities v2.2.2, however, IdenTrust is not responsible for the entirety of the controls to address any single criterion.
